

ContactGrabber® PE

Grab Leads & Contacts by a click

Save Addresses without Re-Typing or Typing Errors into MS Outlook!

1 Mark the address with your mouse and call ContactGrabber®

2 Check address data and save it into Outlook. **That's it!**

Save Leads and contacts in seconds!

ContactGrabber® PE extracts the contact information and adds it into corresponding fields of your **Microsoft Outlook or Outlook Express Contact** automatically!

Highlights

- § **Automatic extraction of contact details**
Simply select a contact information block from any source (mail, website, or document) and call ContactGrabber®. This tool extracts the contact information and adds it into corresponding fields of your Contact automatically!
- § **Easily build lead lists from websites and online directories**
You know, there are only 2 steps for any address you want to get (Microsoft Excel for example). 1) mark it 2) grab it
- § **Support for international addresses**
Best support for american and international addresses in the world
- § **No Typing errors any more!**
ContactGrabber® does this work for you!!
